Represent With One Graphical View

3D Room Symbol Library

## Accurately Represent Specialized Rooms With One Overall Graphic

This BAS graphics library is provided for more specialized rooms where there would be multiple systems serving that space. Benefitting your end user to have an overall graphic for showing these rooms more accurately as a whole.

These appealing and realistic representational graphics are more than what is typically provided with your BAS software. Converting your multiple specialized room system graphics into one powerful visualization that can be interpreted quickly — so operators can act swiftly. The rooms they represent are generally closely monitored and are more sensitive to issues. Seeing all systems serving those rooms on one graphic is ideal, compared to multiple pages to sift through. Leaving occupants more safe and secure, while optimizing your building operations.

The representational 3D Room Symbol Library includes a variety of graphics & animations needed to construct Data Rooms, Labs, and Hospital ISO rooms. QA Graphics symbol library is compatible with more than 95% of major graphic software.

Our representational 3D Room Symbol Library also offers a variety of features, such as:

✓ More than 200 static & animations representational symbols in isometric view

✓ Represent Data Rooms, Labs, or Hospital ISO rooms in one graphical view

✓ Symbols are provided in PNG and GIF file formats

✓ Symbols are separate pieces

✓ Tridium Niagara N4 Module included: allows you to easily substitute N4's existing graphics files
