

# 3D BAS Equipment

## Custom HVAC Library

Our 3D custom HVAC graphics library allows for customers to pick and choose only the system graphics that apply to their BAS system.

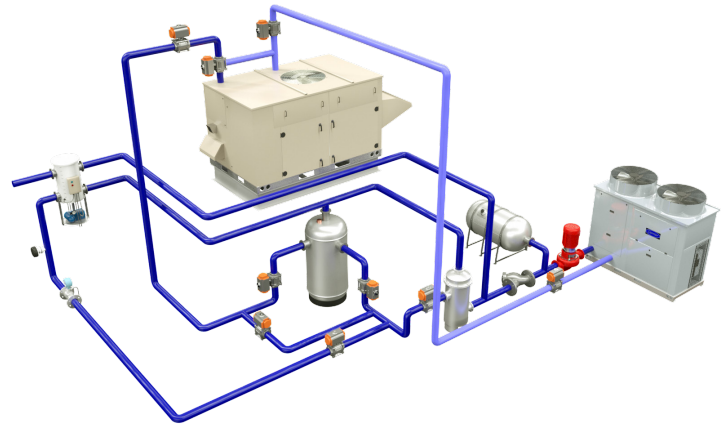

QA Graphics provides photo realistic high-quality 3D designs and renders of all BAS equipment. Showcase your products, services and ideas with professional 3D design and animation solutions. QA Graphics' 3D design specialists can transform your photos, existing graphics, schematic designs, or ideas into incredible 3D graphic representations. Update your building automation system graphics with 3D equipment images from various product lines.

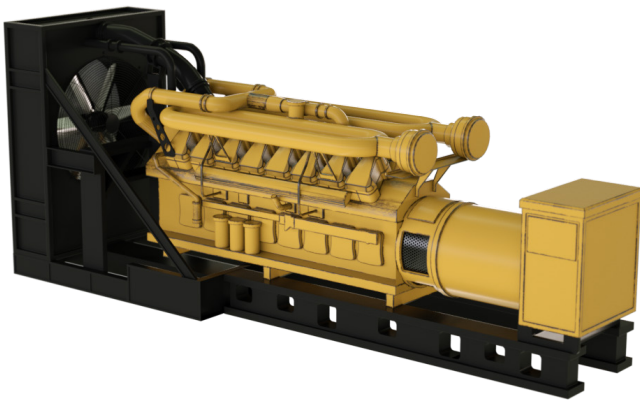

## Custom Air System

Showing the flow and location of ductwork, sensors, fans, dampers, etc. Features include exterior cutaway of shell, animations when necessary, detailed interior, and realistic texture and material.

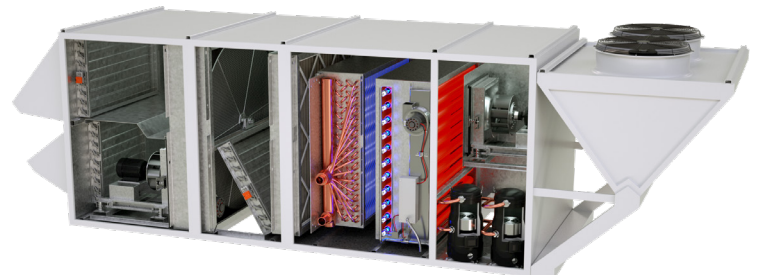

## Custom Water System

Features include realistic exterior view of equipment requested, piping hot water, or chilled water system. Showing custom equipment with piping feeding into other equipment requested.

## Equipment Graphics

Standard 3D graphic representation of a fully customized, realistic image of the exact equipment you have, bringing mechanical concepts to life. Features include realistic exterior view of equipment requested.

## Detailed Cutaway Views

This custom graphics transparent view allows you to see the internal process of your equipment. Features include exterior cutaway of shell, animations when necessary, detailed interior, and realistic texture and material.
