

QA GRAPHICS

2D Texture Floor Plans

Our Standards

High-quality textured floor plans do more than look polished—they address real communication and decision-making challenges in commercial projects. Traditional flat, line-based drawings can be difficult for non-technical stakeholders to understand, but incorporating textures, materials, and visual depth makes it much easier to see how a space is laid out.

When presenting individual suites or entire buildings, textured plans give a more realistic sense of the finished layout. QA Graphics offers 2D textured floor plans that help highlight key features such as accurate layouts, shared amenities, and tenant improvements. Applying consistent, high-quality visuals across multiple properties also creates a unified, professional look for your portfolio—an important advantage for large commercial real estate groups aiming to maintain brand standards. Ultimately, textured floor plans connect technical precision with real-world clarity, helping everyone involved quickly understand the same vision.
